We extend our gratitude to all our customers who have placed their trust in us for four decades, as we also thank our growing team of dedicated employees, from our salespeople and chemists to our support staff and management team. We are all proud of our role in the maritime sector and global logistics chain, and we will continue to serve our customers in line with our corporate values that have brought us here. This is the Chemo promise that we intend to keep.

Welcome to the world of certified high-performance marine chemicals and equipment that make every vessel operate more efficiently, in line with the strictest standards.

CHEMO manufactures and distributes high-quality chemicals to shipping and chartering companies worldwide. Our mission involves helping keep tanks and cargo holds in top shape, supporting maintenance efforts with the right chemicals, while providing the most ideal water and fuel treatment for optimum operation. By supplying vessels with the right mix of certified chemicals, we help customers overcome major challenges and streamline their operation. Our Categories are: Cargo Hold Cleaning, Tank Cleaning, Maintenance, Water Treatment and Testing, Fuel Additives, Equipment.

«Our family intends to further grow our business, serve our customers and support our employees the best way we can, in order to achieve prosperity, trust and harmony among us.»

Eva & Phoebe Karapanagiotou and family

COMPANY: OUR MISSION & VISION

COMPANY: WHO WE ARE

Our Values
Our values drive both our current mission and our future vision. They represent our guiding principles in how we conduct business.

Ethos. We take pride in embedding integrity and ethos in all our operations.

Customer focus. We go the extra step to find innovative solutions for customers and anticipate their needs.

Team spirit. We boast an unparalleled level of cooperation, synergy and respect among all our team members.

Constant improvement. We are always striving to better ourselves in all kinds of products and services we offer.

We are known for

GLOBAL REACH 55 Stock Points serving more than 1000 ports

VALUE FOR MONEY 24/7 hrs Product Delivery Worldwide 99.2% Successful Delivery Rate

Over 40 years of experience in Marine Business

- Founding of Chemo - First laboratory and production facility established in Skaramangas, Greece - Participation at "Posidonia", the International Shipping Exhibition for the 1st time - First overseas branch with stock distribution point in Europe

CARGO HOLD CLEANING

Cleaning solutions that are up to any challenge

As turnaround time is critical, CHEMO offers a wide range of premium cargo hold cleaning chemicals for successful removal of even the most challenging cargo residues.

Our Cargo Hold Cleaning Solutions series not only provides a comprehensive cleaning product range but also a protective coating series to shield surfaces against corrosive freight or high penetrative residues. Our products are cost-effective, water-based and in compliance with the international environmental regulations.

Accepting every cargo challenge

Cargo Hold Preparation
CARGO TANK CLEANING

We'll help you choose the perfect products to overcome any cleaning issue with a personalized plan.

Cargo Tank cleanings are time-sensitive and cost-demanding projects, allowing for field experience and project duration to be two very critical parameters.

CHEMO, with more than 40 years of experience in maritime chemicals and its team of highly trained personnel, is in the best position to solve these issues for you, eliminating risks and maximizing efficiency, while keeping vessels clean and compliant. We offer eco-friendly tank cleaners based on International Maritime Organization (IMO) regulations, low-toxic solvents-based liquids and products that are cost-effective such as heavy-duty cleaners consisting of biodegradable surfactants and detergents.

CHEMO product advantages

- Cost Effective
- High Flash point
- Does not affect paint safe for painted/stainless steel surfaces
- Concentrated Formulas
MAINTENANCE

Vessel maintenance and preparation

CHEMO offers a variety of general cleaners and degreasers for the routine maintenance of your vessel.

Problems like organic loads, grease, waste, sewage built up toilet odors and pipe clogging are major issues in the pipelines and drainage systems of the vessels. CHEMO provides a range of non-aggressive yet highly active bacteria products that remove stains and residues from all surfaces.

Wide range of cleaning products in all Maintenance Categories

Product benefits

- Environmentally Friendly
- Biodegradable
- Concentrated
- Heavy Duty
- Value for Money
- User Friendly

Degreasers & General Cleaners
Oil Spill Dispersants
Electro Cleaners
Bio Chemicals
Carbon Removers
Oil Separators Cleaners
Descalants

CHEMO offers a variety of general cleaners and degreasers for the routine maintenance of your vessel.
WATER TREATMENT

Advanced water treatment solutions

Water treatment is very important for the protection of your equipment and the reduction of engine maintenance.

CHEMO offers solutions that will help tackle corrosion, scale and sludge formation on Boiler & Cooling systems.

Water Treatment Categories

- Boiler Water Treatment
- Sewage Water Treatment
- Ballast Water Treatment
- Cooling Water Treatment
- Potable Water Treatment
- Reverse Osmosis Water Treatment
- Evaporator Water Treatment
- Pool Water Treatment
- Antifouling Treatment

CHEMO Water Treatment advantages

- In the market for 40 years
- Value for Money
- Multi-treatment advantage
- Wide range of testing equipment
- Periodic evaluation of testing results
FUEL ADDITIVES

Fuel additives for optimal results

CHEMO provides a wide range of Fuel Treatment chemicals in compliance with the new emission regulations.

Our products will increase fuel efficiency and reduce emissions whilst also protect your equipment from costly maintenance and protect the environment. Specialized fuel additives will help on combustion, lubricity improver and homogenization of the fuel.

- Wide range that delivers results before, during and after combustion
- Low Cost per ton treated
- Easy and safe to handle
- 40 years in the market
- Compliance to current regulations

Vessel not using fuel additives

Vessel using fuel additives
CHEMO EQUIPMENT RANGE

CHEMO’s comprehensive equipment product range provides solutions for the proper use of our chemical products, maximizing the product’s efficiency and helping the crew to face even the most demanding cleaning projects.

Hydroblasting Machines, Chemical Applications Systems, Pumping Solutions and Personal Protective Equipment are few of the most useful products in our equipment range. All CHEMO equipment are designed for working with marine chemical products in aggressive environments like the sea.

CHEMO Jet Series
